NATIONAL SCIENCE DAY CELEBRATIONS - REPORT

On the occasion of National Science Day, the Alan Turing Club has organised a seminar on "Science for Sustainability" for all the first, second, and third-year B.Sc. students on 28th February 2024. Approximately 150 students participated in the event. The guest speaker for the day was Dr. Malobika Karanjai, a senior scientist from ARCI in Hyderabad. The seminar's primary goals were to increase participants' enthusiasm for science studies and to help them recognize the value of science. In her speech, Dr. Malobika discussed the changes that have taken place in science over time. She also discussed her experience in developing materials using powder technology for various applications. Students gained insightful understanding of how combining several courses could lead to an idea that helps people improve their quality of life.
