Students from both colleges performed on stage, showcasing the cultures of Telangana and West Bengal. The program aimed at providing students an exposure to the culture of West Bengal, its rich heritage and demography. It also enabled students to have a hands-on experience about TV studio, community radio and other facilities in the college. The trip was an enriching experience for the students where they explored a completely different culture, geography and climatic conditions expanding their outlook on India and its diversity. The programme fostered the bond between two colleges and agreed upon organising more events together extending a helping hand in promoting quality education.
