

MoU ACTIVITY – WEBINAR ON HISTOPATHOLOGICAL TECHNIQUES

The Faculty of Biotechnology, Department of Life Sciences organized a webinar in collaboration with Department of Biotechnology at St. Joseph's College, Tiruchirappalli on 23.01.2024. The objective of the webinar is to help students understand the diagnosis and protocol of the disease and aid in the treatment cum research. The webinar included the introduction of the biopsy, followed by the methods of sample collection and analysis. An active response from the students was observed. It was very informative and knowledge enriching program for the students. Virtual platform-based quiz gave better access and experience to the participants. The need for awareness and spreading of knowledge is the best service to nation. This activity helped the students to learn new things, test themselves, enhance their knowledge and apply it in their daily lives.

JANUARY 23, 2024: Biotechnology Students attending the online webinar organized on Histopathology Techniques.
